9. Given below are two statements : one is labelled as **Assertion A** and the other is labelled as **Reason R**

Assertion A : Photodiodes are preferably operated in reverse bias condition for light intensity measurement.

Reason R : The current in the forward bias is more than the current in the reverse bias for a p - n junction diode.

In the light of the above statement, choose the correct answer from the options given below :

- (1) **A** is false but **R** is true
 (2) Both **A** and **R** are true but **R** is **NOT** the correct explanation of **A**
 (3) **A** is true but **R** is false
 (4) Both **A** and **R** are true and **R** is the correct explanation of **A**
