1. With the successful landing of the Lander Module of ISRO's third lunar mission Chandrayaan-3, India has reached the Moon! ISRO tweets "India, I reached my destination and you too." India has also become the first country to land near the Moon's south pole.
2. The Lander Module (LM) of the Indian Space Research Organisation's (ISRO) third lunar mission Chandrayaan-3, launched on July 14, made a successfully landing on the Moon's surface on August 23, making India only the fourth country after the erstwhile USSR, the U.S. and China to make a soft landing on the lunar surface. Congratulating the team of scientists at ISRO, PM Modi said, "India's successful moon mission is not India's alone...Our approach of one earth, one family one future is resonating across the globe. Moon mission is based on the same human centric approach. So, this success belongs to all of humanity."

2. Read the text carefully and answer the questions: [6]

- India is one of the few former colonies of the world that has progressed so far as to become the second-fastest growing economy in the world, along with being projected as a future superpower. Socially, however, India's progress has not been as steep and stark. Its society continues to remain in the tight grip of patriarchy and caste two dominant features that continue to determine how far one can go socially, economically and politically. However, unlike patriarchy that is finally being challenged, caste still remains that dirty laundry in modern India which no one likes to acknowledge publicly.
- Through a Video Volunteers Survey conducted by its Community Correspondents with 490 people from the SC/ST community in nine states, it was recorded that 64% of the respondents have experienced discrimination or atrocities in some form.

3. The survey confirms that there is no space for us to assume that untouchability and other discriminatory practices ended when the Constitution abolished it as a Practice in 1950 through Article 17. In order to actualise the intention of the law, it is necessary for law enforcement and social sensitisation to work concurrently.
4. The survey was rolled out to relay to a wider audience that caste-hierarchy and discrimination continue to fuel inequality in Indian society. When the SC/ST Act was enacted and amended, it was done in order to slowly eliminate the roadblocks placed in front of the SC/ST communities to support them in leading an equal and dignified life as citizens of India. However, the survey provides a compact glimpse into the ground realities.
5. The survey in Bihar, Jharkhand, Chhattisgarh, Maharashtra, Jammu and Kashmir, West Bengal, Odisha, Uttar Pradesh and Madhya Pradesh reveals that 45% people from the SC/ST communities have experienced untouchability - the crassest form of discrimination. The survey also reveals that 15% faced verbal abuse, 12% had experienced physical violence, 10% were denied access to public places, 7% were denied an economic opportunity and 1% had been raped or had experienced other forms of sexual assault.
6. The survey on caste-based discrimination and atrocities also reveals that only 21% of those who had faced some form of discrimination filed a report with the police. This doesn't come as a shocking revelation because raising one's voice corresponds to vulnerability to social boycott, physical violence or losing one's source of income. The top-tier position in most organisations is held by 'upper-caste' men, which can place people from 'lower-castes' and women in a disempowered position.
7. Of the small number of people who did report going to the police, 63% said that the response of the police was not helpful. Just as both the formal and informal sector is dominated by 'upper-caste' men who mostly lack sensitisation, one of the building blocks of a democracy, the police too is dominated by 'upper-caste' men and they may refuse to support a person from the SC or ST communities.
